

Compact POE Module

GP31-2P01C

Overview

The Indoor/Outdoor Compact POE Module serves as the connection point between the building and the living unit, installed on the exterior wall or in the breezeway to shield it from direct exposure to the elements. It links the building's fiber infrastructure to the living unit's internal network, facilitating smooth connectivity.

Features

- . Compact size
- . Subtle design
- . Easily mounted on the wall with just two screws
- . Equipped with internal fiber guides for straightforward installation
- . Can be installed on any vertical surface
- . Durable plastic construction for high mechanical resistance and efficient design

Dimensions and Capability
